

Task List for the Developer

Audit scope: Russian version of the homepage of an international hotel chain’s website

Audit date: October 5, 2026

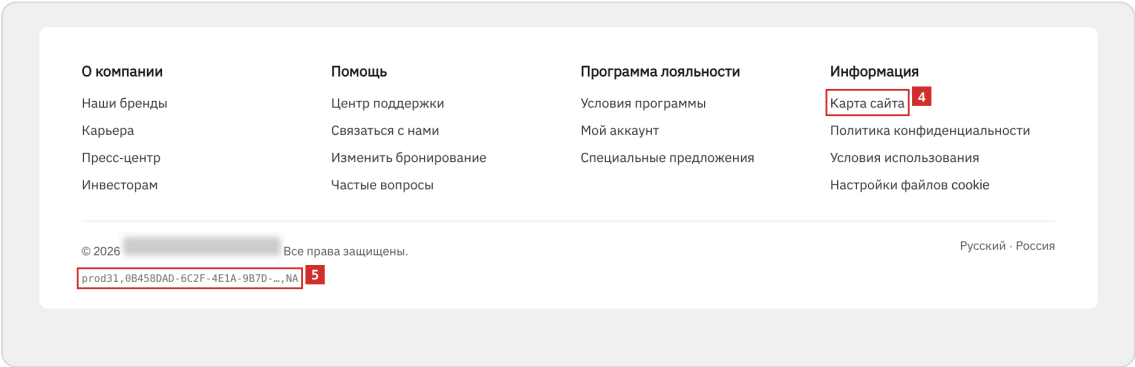

Test environment: desktop computer, Chrome browser

Scope of work: 2 technical errors, both major

Audit document set: executive report · task list for the editor · task list for the developer

This task list contains errors that require changes to the website’s code or settings. For each error, it shows the location on the page, steps to reproduce, the actual result, and the expected result. After making a fix, mark it in the “Done” column. If a fix cannot be made or you disagree with it, state the reason in the “Comments” column: an EPG Global ONE expert will respond. Error numbers match the executive report.

No.	Where on the page	Steps to reproduce	Actual result	Expected result	Done	Comments
● Major						
4	Bottom of the page, “Sitemap” link «Карта сайта» https://[website address]/ru/	Open the page, press Ctrl+F, type «Карта».	The word is not found: the first letter is a Latin K (U+004B). Screen readers pronounce the word incorrectly.	The first letter is the Cyrillic K (U+041A). Check the other links at the bottom of the page and in the menu for Latin letters.	☐	
5	Bottom of the page, last line https://[website address]/ru/	Open the page and scroll to the very bottom.	Visitors can see the system code string «prod31,0B458DAD-...,NA».	The code string is not output to the page. If needed, it remains in the page code, invisible to visitors.	☐	

WHERE THE ERRORS ARE LOCATED

Fragment of the bottom of the page. The marker numbers match the numbers in the table.

- On request, each error is provided as a ready-to-use ticket for your task tracker.
- After the fixes, a follow-up check by EPG Global ONE confirms that the errors have been resolved and no new ones have appeared.
